DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group II (claims 1-28) in Paper No. 10 is acknowledged. Claims 29-52 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a non-elected invention, there being no allowable generic or linking claim. Election was made *without* traverse in Paper No. 10.
2. This application contains claims directed to the following patentably distinct species of the claimed invention: *[1]* irradiating a laser beam to the first polycrystalline semiconductor film to form a second polycrystalline semiconductor film, wherein the first polycrystalline semiconductor film is crystallized in the range from 92 to 99% in a region which becomes an active layer of a TFT; *[2]* irradiating a laser beam to the first polycrystalline semiconductor film to form a second polycrystalline semiconductor film, wherein in the first polycrystalline semiconductor film, the total area of amorphous regions in a region which becomes an active layer of a TFT is set from 1 to 8% of an area of the region which becomes the active layer of the TFT; and *[3]* irradiating a laser beam to the first polycrystalline semiconductor film to form a second polycrystalline semiconductor film, wherein the first polycrystalline semiconductor film, wherein an area of each of amorphous regions in the first polycrystalline semiconductor film is equal to or less than $10.0\ \mu\text{m}^2$, and wherein an area of at least one of the amorphous regions is equal to or greater than $0.30\ \mu\text{m}^2$.

Art Unit: 2822

3. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.
4. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.
5. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species (MPEP § 809.02(a)).
6. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Art Unit: 2822

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Toniae M. Thomas whose telephone number is (703) 305-7646. The examiner can normally be reached on Monday through Thursday from 8:00 a.m. to 5:00 p.m.
